They also have on hand at all times, the best hickory, oak and pine wood. See advertisement.

Messrs. W. W. Woolford & Co., proprietors of the extensive fruit drying establishment of Ridgeway, advertise in to-day's NEWS that they will purchase fruit and vegetables at market rates, delivered at certain points mentioned in the advertisement. This is one of the largest and most successful "drying" establishments in this country, and parties who have good Irish and sweet potato land would do well to heed this announcement before 'pitching' their crops for something less certain and less valuable. We can vouch for the responsibility of the firm, who will, as heretofore, regard all contracts as sacred, prompt and bind-

THE "BEAN SHOOTER" NUISANCE. Yesterday one of the large panes of French glass that adorn the front of Jno. C. Palmer's jewelry store was broken by a naughty "bean shooter" of a boy, who escaped around Haywood's corner before he could be identified. In regard to this nuisance the bad boys of Raleigh seem determined to persist in, and the loss of Uncle Johnny's window glass, we shall have but little to say, because there is no use grumbling over spilt milk, and had this been all the damage incurred by the "bean shot" we would stop here, but not so. Capt. Lamson, Mr. Palmer's senior inspector of broken watches, lame clocks and smashed up jewelry, was sitting at the window, with eye-glass on, pinchers in hand, manipulating the most intricate parts of a hunting case lever, when the crash of the pane occurred. A glance revealed the fact that it was a shot; the gallant Foreman Lamson, of Hook and Ladder Company, No. 1, who had borne the brunt of a hundred fires, scaled burning walls, defied falling bricks, stood upon burning roofsmade an inglorious retreat to the rear, falling first backwards over the stool he was occupying, upsetting an old clock out of repair under the counter, and smashing the glass front of the same. In his precipitate flight through the back room, he upset the rocking chair in which Uncle Johnny had just fallen asleep, throwing the old gentleman and the Christian Advocate which he had been reading, out on the floor. The yard door happened to be locked, or the Foreman would not have yet halted. It required at least a half hour of special investigation and enquiry for Uncle Johnny to fully comprehend the situation, so completely was he "upset" by the "main spring" of his establishment in whom he had full confidence. It was finally cleared up; the Captain returned to his post, and Uncle Johnny returned to his rocking chair to muse over the probable effect of a cannon shot in

AN OLD JOKE BUT GOOD .- A few days ago a sharp individual while sauntering along Fayetteville street happened to pass a trio of young Republican lawyers. He did not pause to join the conversation, or address any of the group by name, but merely raised his hat and said, "good evening, Mr. Solicitor," whereupon all three hats were egerly elevated and "good evening sir," was given in full chorus. The pedestrian smiled blandly and kept on his

question. Adopted.

Rules Suspended. On motion of Mr. Ellis, of Columbus, the bill to amend section 30, chapter 90, laws of 1872-'73, in reference to the school law, was taken up. The provisions of the bill repeal all laws in reference to free public schools, except as such contained in the above named section and chapter of the laws of 1872-773, and that sec-tion so amended as to add after the words "of each county," in line 16, the words, "and furnish the County Treasurer with the amounts thus appropriated among the school districts. and the amount that each district is entitled to." It provides further that the word "July," in section 38 of the same chapter be stricken out and October inserted therefor.

A skirmishing debate ensued on the passage of the bill. Messrs. Ellis, of Columbus, Norwood and Seymour advocating, and Mr. Murphy oppos-

The bill passed its readings, en grossed and sent to the House. Special Order.

The revenue was resumed at 12 o'clock as the special order, and the balance of the day occupied in the discussion of a number of amendments to the various sections. As the bil, will be published when

perfected, the Reporter deems it a useless waste of space and time to re-port the various alterations, amendments and discussions thereon, especially as it would be next to impossible to make the report intelligiole, unless the printed bill was before each reader. Adjourned.

ceipts showed that he had even less

than that number present.

The amendment prevailed and the

lutions: WHEREAS, It is the interest of North Carolina to encourage in every laudable way immigration to the State, and Whereas, the people of North Car-

olina are ever ready to welcome with open arms all who come among them for the purpose of buying lands or engaging in any and every branch of the various industries of the State;

Whereas, on the 17th of March, 1874, it is proposed by Rev. Father McNamara, to hold a grand Immi-gration Convention in the city of Raleigh, to testify our wish and desire to see the sturdy sons and fair daughters and matrons of other nations come and possess the vacant places and idle lands in our m.dst;

therefore, Resolved, That we, the Representain General Assembly assembled, most cordially appreciate and endorse the suggestion to make the celebra-tion of St. Patrick's Day the occasion to assure, not only the worthy sons of Ireland, but those of all other nations, that we, the people of North Carolina, extend to them a hearty welcome to our borders, and to assure them also that the laws of this State are sufficient and ample to secure to them all the rights and privileges enjoyed by native sons of North Carolina.

Resolved, That we recommend to the people of North Carolina that they make the approaching 17th of March an occasion worthy of the object which the friends of the matter have in view, by attending the proposed Convention, and giving expression to their feelings in this regard, as an earnest of our desire to attract population, skill and capital, that thus our country may be space of time, supersede the old style our vast resources be properly developed, and that the good name of North Carolina may be made widely known among the nations of the earth.

CAPT. L. R. EXLINE. - By reference to the advertisement in another column of the grocery firm of Wayne Allcott & Co., it will be seen that the gentleman whose name heads this article, having formed a business connection with Mr. Allcott, has settled in our city. Capt. Exline, for several years past, has been the popular and efficient General Superintendent of the Cape Fear and Deep River Navigation Company, and from Lockville to Fayetteville, in the counties of Chatham, Harnett and Cumberland, there is no man more extensively or favorably known. That he will prove a valuable accession to our business population there is no room to doubt, and we wish him that success his energy and enterprise so richly merit. As before stated, the firm of Messrs. Wayne Allcott & Co. have removed to the large and elegant store recently occupied by Mr. W. C. Stronach, under the News office, where they are daily receiving fresh groceries of every grade and character, and are prepared to sell at either wholesale or retail on the most liberal terms.

Joseph, for several years past the mail route agent from this place to Norfolk, has been displaced and Calvin Rogers, the ex-postmaster, ordered on duty in his place. The why's and wherefore's of this change are not stated, and Joseph did not know himself that he was to be removed till his successor appeared for duty. Joseph, though much of a Radical

ernment and the public, in fact was one of the most efficient agents in the State. His successor is a man of less gallon cask to a grocer to be filled another of the many low machina-with whiskey. The grocer returned tions of the rotten Radical party.

A STATEMENT IN REGARD TO THE STATE GEOLOGIST AND MATTERS CONCERNING THE VIENNA EXPOSI-TION.—At the request of a gentle-man we give place in our columns to the following in relation to the action of the State Geologist in connection with the Vienna Exposition The statement came to us as a communica-

of the Senate to refund to certain citizens the expenses of the N. C. ex-position at Vienna, which report was adopted by the House, the singular statement is made that Prof. Kerr admits that he made the expedition in violation of law. Prof. Kerr admitted nothing of the sort. On the contrary, he cited in his published report, the resolution of the Legislature authorizing it.

The Governor saw no illegality in it, who was by law supervisor of that as of all the operations of the Geological Survey. The press saw nothing illegal in it, who unanimously urged and aided the movement, and even proposed to tax themselves to furnish the funds. Those members of the Legislature, the most prominent and influential in both Houses, who were consulted, saw nothing illegal in it, but unanimously advised and probut unanimously advised and pro-moted it; and with them agreed such men as Hon. D. M. Barringer, Gov. Vance, Gen. Ransom, all of whom and many others of the best men in the State aided both with advice and

assistance.

The Professor might well prefer to err in such company and in such a cause than to be right with Mr. Waugh. And as for the rebuke contained in the same report, as it has to suffer such a long division, the Professor will probably be able to survive his share of it. But it may be fairly presumed that all these gentlemen will lay this rebuke to heart and won't do so no more."

LEGISLATIVE.—In the Senate yesterday the day was almost exclusively occupied in the discussion on the various sections of the revenue bill, the most important of which was the amendment to strike out \$10 and insert \$5 per night tax on theatrical companies, and \$50 per quarter, instead of per month. Messrs. Waring, Seymour and others, advocated the amendment, and Mr. Merrimon opposed it. It was clearly shown by Mr. Waring that in 1872, when the taxes were as the amendment now proposed, the revenue in Wilmington from such sources amounted to \$310, and last year when the taxes were increased to \$10, the revenue amounted to \$135. In this city the revenue in 1872 amounted to \$135, and last year only \$85. During the discussion, Mr. Merrimon said that an audience of a thouspersons generally attended first-class theatrical troupes in this city at from 75 cents to \$1 per head; that he was present when Ole Bull gave his performance in this city

Gen. D. H. Hill states, as a matter of personal knowledge, that General Lee had only 27,000 men when he joined battle with Gen. McClellan at Sharpsburg. The force of the latter is estimated at from 80,000 to 100,000. That he made of the engagement a drawn battle was strongly illustrative of the courage of our soldiers and the skill of their commander.

The English have triumphed in their onslaught upon the naked niggers of Ashantee. The native king not only wants peace, but proposes to pay £200,000 for the privilege of being thrashed and dispoiled. The Ashantees have a population of about 3,500,000. There are seven English settlements in the country, containing 500,000 people, only 500 of whom are Europeans.

A Washington writer says: "Mr. Hubbell, of Michigan, is an odd sort of joker. On Monday last he offered a bill in the House, the title of which was 'a bill to regulate the debates in the House on Saturday.' Of course, every one supposed that he intended to correct an existing evil and correct the flood of buncombe that is poured upon the House every Saturday; but it seems Mr. Hubbell only wanted to perpetrate a joke, for the bill had nothing to it but the title, and he says he never intended to fill it out."

General McDowell, military commander of the South, thinks it would be unwise to make any reduction in the military branch of the South, upon the ground that it would be difficult for the civil authorities to execute the laws in some of the States if not for the presence of the military. General McDowell, in order to prevent the cutting down the number of his armed revenue, thus does injustice and wrong to the population of a large portion of the country, and while placing the people of the South in a false position, puts himself in a ridiculous light.

THE citizens of Petersburg, Va., are quite jubilant over the passage through the State Senate of the charter measure which is intended to free that city of negro rule and return once more to white man's government. THE Charlotte Observer speaking of the bills now before the Senate providing for the enlargement of the urisdiction of magistrates and for the holding of monthly courts by three Justices of the Peace to be chosen by the country authorities justly says: "When we see three respectable Magistrates on the bench elected by the people of the county as in old times, we have confidence that justice will be administered and the affairs of the county properly attended to. On the contrary in those unfortunate counties where negroes have a majority this will be a dangerous power to entrust to their hands.

The italics are ours, and we use them to direct attention to the great danger which would follow the pas- rupted." sage of these bills. We write in no spirit of hostility to the negro. We wish sincerely for his well doing, but we cannot deny the evil likely to come from any increase of his authority in those counties subject to his sway. These counties are indeed unfortunate, and it is in their behalf, from a jealous and tender regard for their well doing that we have urged Senators to consider well before they enact these bills into laws. In the more fortunate counties the scheme might work beneficially, but in these counties it would be productive of the greatest harm.

In behalf therefore of the people of Granville, Warren, Halifax, Northampton, Bertie, Hertford, Pasquotank, Washington, Martin, Edgecombe, Craven, Bladen and New Hanover and others who may be similarly circumstanced, we protest against the passage of these bills. These are among the largest tax-paying communities in the State and surely they deserve some favor, some mercy from the Legislature.

WE see in our exchanges occasional outeroppings of a disposition to complain of the Legislature because of the length of the session. We do not allude to the matter for the purpose of condemning this spirit, but in order to say a few things that should be said in vindication of the gentlemen of the General Assembly. Very many very important measures have been considered at this session of the Legislature-measures which were singularly fraught with either good or evil to the commonwealth. The public debt, the consolidation of our railroads, amendments to the laws of the State, allowable by reason of the changes in the organic law made by the ratification of the new articles in he State Constitution—these matters that demanded the most attentive consideration, and we are happy to say they have had it.

No legislation is so dangerous as that hasty legislation, which based upon the idea that the great duty of a legislator is to convice his constituency of his desire to practice economy by short sessions. Every measure presented should have careful and thorough investigation. Then our statute books would not be crowded with laws that are found, when put into operation, to be unwise and injurious; nor would there be the need, at each subsequent session, for amendment and repeal of the doings of its predeces

These enterpris- S I L K H A T S es are usually conducted by associated capitol and the gentlemen comprising the various companies desire incorporation for the protection of their property and the furtherance of their interests. These enterpises are local in their character but public in their results. They add to the aggregate wealth of the State, increase the amount of its taxable property, and increase its revenue. They deserve encouragement. They need to be fostered, and the legislature would act with exceeding want of wisdom if it refused to do all in its power to aid in their development. Much of its time is occupied in legislation of this seemingly private character, but every act passed in furtherance of these industries is an act in the interest and behalf of all the people of the State.

Advance Payment.

Having adopted the cash system or advance payment upon all subscriptions, we deem the following article from a late number of the Galveston (Texas) News as exceedingly appropriate and to the point. Says the News:

"We have often heard very intelligent people complain of being required to pay subscriptions in advance, as unreasonable and unjust to the subscriber. We think that we can show that such complaint is not only groundless, but that advance payment is quite as much to the interest of the subscriber as the publisher. Thirty years of experience has convinced us that a subscription paid in advance is worth twenty-five or thirty per cent. more to the publisher than when paid at the end of the year. This greater value is not from having the use of the money year earlier, but mainly from the fact that the payment in advance saves the publisher the usual commission of twenty-five per cent. for collecting, and an average loss of nearly as much more from subscriptions that are never collected. With all the care and caution that can be exercised we think it is very near the truth to say that the usual amount of subscriptions totally lost to the publisher is about twenty-five per cent, of the whole. But the credit system also requires an extensive and laborious system of book-keeping, and also in-volves considerable expense in writing letters and paying postage to all

parts of the State. Now, all this heavy loss may seem, at first view, to fall only on the publisher; but a little reflection will convince any one that the publisher would soon be bankrupted if he did not find some way to throw a large part of this loss upon others. And this he does by increasing his subscription price so as to make up for the loss, or a large part of it, or by reducing the expenses of his paper and lessening its value. In either of these cases the paying portion of his subscribers are made to pay for the loss caused by the balance, much in the same way that the merchant makes his customers pay the various duties, taxes and charges of all kinds imposed upon the goods he sells. The first loss falls upon the merchant in the one case and the publisher in the other; but they are both compelled to make their patrons pay that loss, or they would be bank-

RAID UPON BOSTON HOTELS.—The State police of Massachusetts made raids upon all the Boston hotels last Wednesday night, and seized and carried off all the wines, liquors, ale, &c., from their bars and cellars. At the Tremont Hotel they seized about \$3,000 worth, and at Young's about \$10,000 worth. The guests of the hotels were greatly disgusted, and as the police carted away champagne, other costly wines, and the various kinds of liquor seized, they were hooted and jeered at by crowds of people.

THE BUTLER AND FLORENCE DUEL. -Several days since, and particularly yesterday, there were rumors of a personal altercation between George H. Butler, a critic for a New York paper and a letter-writer for one of our Sunday papers, and W. J. Flor-ence, the comedian, now performing here. In response to some comments of "G. H. B., as he signed himself, in which Mr. Florence was implicated in an unenviable manner, Mr. Florence said he would hold the writer personally responsible, and had cards printed to that effect in the several daily papers. Butler, who fought several duels while American consul to Egypt, arrived in this city yester-day morning from New York. Soon he called upon Mr. Florence, and told him he had his remedy if he felt ag-grieved; whereupon Mr. Florence settled the matter, it is said, by with-drawing his statement that he would hold the "writer personally responsihold the "writer personally responsi-The police authorities expected the meeting, and some of the officials were in the hotel when the parties met, and looked every minute for a collision, but were surprised to see the couple start for the wine-room and settle it. The Pall Mall Gazette is a firm believer in the story that an invention is ready for parents which acts as fol-"You simply insert the begrimed and molasses colored infant in an orifice, which can be made of any required size by turning for ten minutes a cog-wheel with electric attachments. The child glides gently down a highly polished inclined plane; his lips are met at its terminus by an India rubber tube, from which the infant can draw lacteal nourishment. While in this compartment, which is lined with plateglass mirrors, the purturbed spirit of the infant is soothed by its frantic efforts to demolish itsown image, reflected in the glass with a nickleplated combined teeth-cutter, nail, knife, rattle, and tack hammer, which are thrust into the baby's hand by an automatic monkey. Fatigued by its destructive efforts, the infant falls asleep, while the organ attachment plays softly the melody of "Put me in my little bed." Then it slips into the third compartment. Here the baby is washed. Another small tube administers a dose of soothing syrup, and the infant glides from the machine, its nails pared, its hair combed, ready for the habitiments rendered necessary by the fall of our first parents.

Petersburg, Va., December 17th, 1873. To the Farmers and Guano Dealers of North Carolina and Virginia: Gentlemen: To the mary of you with whom I am personally acquainted. I would say, that of good results from GUANAHANI GUANO, I have not the shadow of a doub. Containing, as it does, in such large amounts, the essentials for plant find, success from its application would seem certain. It being of animal origin, you will see at once that its ingredients must be all a luble in the all. Its nitroven from nitric acid, is the most available form known to chemistry; the other part, from undecomposed animal matter, is preferable to the volatile salts in Peruvian Guano. I ask of each of you the kindness of a thorough examination of the accompanying analyses by two of the great chem ists of the country. With respect, yours truly,

Dear Sir: Dr. F. A. Genth, whose Analysis of the Guanahani Guano you have shown me is Chemical Minerologis, to the Geological Survey, and has cosuperior as achemia. I have no hesitation in endorsing any analysis from his laboratory. And I think the analysis systifies his statement that the substance examined by him is a VALUABLE 4 ANURE.

From his report, and that of Prof Wilson it is evidently a TRUE GUANO, both in crisin and composition, and its action on crops, may be expected to be the same in kind.

ANALYSES. The following analyses of different cargors and samples by two of the leading chemists of the country, are given for the guidance of the public: LETTER OF PROF. P. B. WILSON, LATE ASSISTANT OF BARON J. VON LIEBIG.

CHEMICAL LABORATORY OF PROF. P. B. WILSON, No. 39 Second Street,

Battimore, December 1st, 1873.

MAJ. N. M. TANNOR, President Guanahani Guano Company, Petersburg, Va:

Dar Sir: I has e-drawn samples of the Guano, as it has arrived in cargo lots, and find it exceedingly uniform in the amount of Phosphoric Acid it contains, namely, f om 15 to 19 per cent. This is combined with Lime, and its of animal origin, and readily assimitable by plants. It contains potential cumonia and nitric acid, baving a combined Nitroge value equal to from 2 to 3 per cent. Of ammonia, with the alkalies Potash and soda, and valuable proportions of sulphate of Lime. The whole forming a very desirable combination for all crops, and who applied to land, the crop receiving proper till age, must, in my opinion, give as good results as any guano offered to the farmer.

Bein of animal origin, the organite matter has undergone partial decomposition, and it accessarily contains a valuable amount of Humos, which makes its fertilizing power much greater than fertilizer which are compounded large y of Peruvian Guano, which, beyond its ammo its and small phosphate value, has it it ear no power in absorbing from the atmosphere and retaining in the soil the movable elements absorbed by moisture and brought down by the rains, as the guano you are now placing upon the market All of the compounded to a sit of this Guano are vere soluble in the soil, and passes such only stead properties as to render it at all times and under all circumstances as in mediately twaliable plant food.

The late samples you sent me for analysis, from the deposit which you inform me you intend to ship from, show a decease in the properties of the plant food.

UNIVERSITY OF PENNSYLVANIA, WEST PHILADELPHIA, 19th, 1878. UNIVERSITY OF PENNSYLVANIA,

Maj. N. M. Taannor, Petersburg, Va.,

Dear Sir: In compliance with your request, I have snalved sample of "Guanahani
Guano," and have made additional exam nation of an average sample from a lot of 300
ons, the result of which, I beg to embrace in the following 'The Guano is a brownish
powder, with lumps of combinations of time with Carbonic Phosphoric and Nitric acids,
it contains a consid rable quantity of water about 20 per cent.), and when dried is a paler
orown powder. The Guano is evidently of animal origin, and the minute bones, which
were discovered in the same, indicate that it is he result of the decay of buts mice, &c.
The quantity of organic matter, which is sith present, is about 12 per cent., and this
ields about 2½ per cent. of ammonia. A portion of the nirrogen is present, as nitric
icid, of which about 3 per cent. wa found, all the nirrogen present would be equivalent
to about 3½ per ent. of ammonia. The phosphoric acid in the Guano, about 12½ per
cent., equal to 27 3 per cent. of bone pho phate. A considerable quantity of the phosphoric acid, his wever, is present, as so-called neutral phosphate of line, which, being
slightly solved in water, renders the Guan as quick in its action as a corresponding
quantity of superphosphate would do. The smalt per centage of pot sh, which was found
in the analysis, and to the stalle.

From all the experiments which I have made of the Guanahani Guano, no doubt can
exist that it is a valuable manute.

Yours truly,

Iliniterative of Pennsylvania.

Dear it: Yours in regard to the strang was received some time ago, and as I know very little, personally, about the effect it had, I laid it aside until I could go home and in quire. I learn that it did improve the wheat to some extent. I did not apply any other Guano. I applied
Bone Pust, and I learn your Guano was of about the same efficacy in fertilizing, so far as the appearances of the crop indicated.

Please send me a bill for Guano, and I will send you a check.

Mr. E. A. Dunlay,

Dear Sir: I used your Guano on my wheat last fall, and I am highly pleased with it.

Inthis is as good as the high priced Guanos. I have a good paying crop of wheat, and this is the opinion of those who have seen both, the bests and of grass I ever had, and this is the opinion of those who have seen both, and this fall, and I am highly pleased with it.

GUANAH ANI GUANO! GUANAHA A GUANO! I used your Guano on wheat last yest, and consider it equal to any guano i ever it pleases me west.

Dear sir: It I could have made collections, I certainly would have used two tons of
the Gunno you want me the fall.
I consider it better for wheat then any other Guano that has been used in this county Respectfully yours,

Mr. E. A. DUNLAP,

Dear sir: The Guano purchased from , on was used upon coin by the side of one of
the best ammodated soluble phosphates in the market. The quality of the land was
the same as was the quantity of guano and phosphate used. The corn, where the Guano
w a used appeared to start sooner, and in the fall was juily ten inches higher and ripened earlier than where the Phosphate was used.

E. T. Wroth, Esq., Baltimore, Md.,

Dear Sir: I have your layor of 4th inst., making inquiries as to the results from application of the Guano which you sent me last fai. I as pled it at the rate of 170 pounds per acre—the same quantity as of the other fertilizers I was then using. The wheat infourhout the field bore much the same general appearance, with perhaps something in favor of your Guant. The grain of my crop on that field was nersally of fine quantity, and I cannot say that I observed any perceptible difference in its appearance.

The result in quantity, (the most important point,) in gret hot to be able to give you. Threshing my crop by sleam power, my attention was complement an analypoints at the same time, and on one of these oreasions this particular pero 1 of wheat was threshed before I was aware of it, and without any note of its comparative yield. I there are cannot pronounce tool ively in its favor, over others; but, from its general appearance, I judge it quite equal to other standard ertilizers of established reputation.

Very respectfully yours,

Was Hanky Da OURCY.

E. T. WROTH, E-q., Baltimore Md., lear xir: Yours of the 4th received and contents noticed. You must excuse me for not reporting to you sooner the result of the experiment with year Guano. I see ed it by the side of * * * * * * Raw Bone Super-Pho-phate, at the rate of 15 ibs. to the ad o, of each. Whilst growing, I in rany to whom I she wed it, could not perceive the least difference. The yield was equally g-od—about 25 busiles to the acre. I consider it equally as good as * * * * * s, in every respect. Please inform me the price, as I intend using some on wheat this fall.

WM. R. GEIFFITH, Esq., General Agent,
In reply to yours of the 12th, will ay, the farmers can say but little, as yet, in regard
to Guanahani Guano. But Maj A. G. Davis, who used one bag, by the able of several
other fertilizers says, so far, the Guanahani looks better than any of the others. All
parties say, so far, they can see no difference in their grain wherever it is up anticient
to judge. By the opring, I can give you a more astisfactory report. Hoping to have the
pleasure of a visit from you, soon.

P. S.-I have commenced making a stir for the Spring trade. W. R. GRIFFITH, Esq.,

Dear Sir: 1 ours of the 12th inst., was re clived on yesterday, and, in compliance with your request, I hasten to reply. I purchased half ton of Guanaham, Gua o, from Mean. Kowlett & Tannor, 1st of October, 1s73, to use open my wheat crop, as an experiment. I applied to 20 lbs., per acre. The wheat was secuted ir an the 10th to the 17th of October I was very coreful in the application, leaving two strips of land through the field; one of an acre. the other two acres the one acre strip was manured with """ Phosphate. The two acres strip was in tobacco, heavily manured with stable manured and """ Phosphate. The two acres strip was in tobacco, heavily manured with stable) on one end, three-fiths of an acre. Upon this I spplied 100 lbs. of Guanaham, and also moistened the wheat and rolled it in the Guano (I mean the wheat sewn upon this three fifths rip.) The sease in has been favor, ble, and the young wheat is looking very well; and the tupon the narrow trip of poor land, equally as good as upon the heavily manu ed tobacco and. I am seti-fied hat the Guano is acting upon this strip of wheat, as the land was very poor. I do not think that it would be well for me to make a positive assertion just yet, but will carciuly note the result and let you hear from me again.

Yours respectfully.

Messrs. Rowlett & Tannon,
Dear Sirs. In repiv to your inquiries in regard to the Guanahani Guare, which I purchased last summer. I can only say that i applied it on my wheat crop, sowing it breadcast and plowed it in with the wheat. So far I am vary much pleased with the Guano. Where I used it, the wheat looks bette than any I have see. And my neighbors who have seen it, consider it so. I applied it the first of October, and it shows very plainly over the wheat where there was netting used.

Very respectfully,

JOHN J. MITCHELL. [NOTE.-Mr. Mitchell has since ordered 10 tons for his Spring crops] Mulstone Landing, Md., December 1st, 1873.

Mr. E. A. DUNLAP,
Dear Sir I am just in receipt of your letter, but regret that I did not receive it sooner.
I used your Guano side by side with * * * * * Ammonlated Super-Phosphate, and
could perceive to difference, only in growth of the straw. The straw from * * * * * * * *
rather the largest. The grass from it was equally as good, and I do not hesitate in recommending it to fairners as a reliable fellinger.

Very respectfully,

ELKA AH WISE.

Messrs. McLuming & Co., Petersburg, Va., Gentlemen: I used the Guananan: Guano, purchased of you, on wheat at the rate of see its, pracre, on corn land. The wheat is toking well. I think it will prove a good fertilizer.

Messrs Rowlett & Tannou, Petersburg, Va.,

tear Sirs: I used on my wheat, sowed about the lat of October, a half ton of Guanahani Guano, and s far I am very much pleased with its action. Where I used the
Guanahani tre wheat is took my remarkably well—a great deal better than the wheat
sown on a pea fallow.

Very respectfully, Prince George County, Va., December 18th, 1873. Messrs, B'shop & BDANCH,
Sirs: You ask nemy of infen of the Guans hand Guano I purchased of you last fall.
I used the suppose of my wheat, but owing to the unfavorable fail for the growth of
wheat, it would be impose be for any mapper to show its strength fully. Powever, I
think the guan oa good a rtilizer, from the fact, that the wheat looks as well as it does
where a well known fertilizer was used that cost nearly double the money.

Respectfully,

A. G. JORDAN.

WM. R. GRIFFI'H, General Agent of the Guanahani Guano Company,
Dear vir In reply to your enquiry about the action of the Guanahani Guano on my
wheat crop, I would say, up to the present time it is looking very well.
Yours truly,

Mr. E. A. DUNLAP,
Dear Sir: I let one row without your tertilizer, and used it on the next row. I used at the rate of 200 pounds to the acre. I had the corn care uity gathered separate, and found the teauth as follows: From the Guano row I shelled one bushel and nearly a half gation; from the row without guan. I got a half bushel and not quite a quart; making thily nouble where I used guano. The growth of stalk was not proportionately heavy—the strength seemed to go to the grain. I think it an excellent spring fertilizer. The land I tried it on was quite thin. Yours, &c., A. D SMITH

Poplar Mount, Greensville County, Va., December 17th, 1872.

Mestrs. Rowlett & Tanker R
Gentlemen: Yours of the 15th is received. You ask "How I like the Guanahani Guano, so far?"

In reply I have to say that I used five bags last fall, experimentally. I applied four bags to wheat at the rate of 200 pounds to the acre. I used the same quantity (20 pounds) on winter outs. The wheat was not sown until about the 20 h of October, but has already a healthy viscorous blade. The piece in tradications lead me to believe that it is decidedly superior to any of the sup rephosphates.

The winter of the sup rephosphates.

The winter of the ween the last of September. In the application to this crop, I have, in consequence of earlier seeding, a better opportunity of observing the effect of the Guanahani Guano. Here it is must marked and decided. It reminds me of former divis, who in for a in oderate outlay of money, the farmer purchased the pure Chincha Island. (unadulterated) Peruvish Guano.

I wish to try some of this Guano next year on cotton and tobacce.

I am, very truly yours,

GEORGE W. FIELE.

The Company recommend an application of from 200 to 250 pounds per acre, but not over the larger amount.

As it will be impossible to bring but few thensand tons to this country in time for the spring trade, orders must be sent t an early day to secure it.

The Attempted Assassination of a SAN FRANCISCO, Feb. 10.—The following are the particulars of the at-tempt to kill Iwauka: As Iwauka was returning from the Mikado's residence to his own dwelling, his carriage was stopped near the outer cas-tle moat by a bamboo pole stretched across the road. The sides of the vehicle were cut through by swords, and Iwauka hastily descended and found himself attacked by several armed men, from whom he received wounds in the loin and shoulders. He ran to the moat close at hand and sprang into it and remained hidden for about an hour, after which he returned to the Mikado's house to which the foreign surgeons were summoned who at once discovered that his injuries were in no degree dangerous. He will probably be able to resume his duties in a few weeks. This is the first attempt at assassination of a high official since the murder of Hirasawa Sango in 1872. No clue has yet been discovered.

On motion of G. F. Hoar, the bill was made to apply to matter heretofore sent, and was then passed. The House then went into Com-

mittee of the Whole on the Army Bill. The fourth section of the bill requires that all claims for stores or supplies, taken or furnished during the rebellion for the use of the army, including all such claims now pending and undetermined in any department of the government, shall be presented before November 1st, 1874, to the Southern Claims Com-missioners, who shall have exclusive jurisdiction to hear and determine them. All claims not presented before that day are to be rejected. The transfer of the claims from the Quartermaster's Department is to be considered as a presentation of the claims. This section gave rise to a long discussion, and many amendments were offered to it.

The most important amendments that were adopted were, one offered by Young, of Ga., extending the time from Nov., 1874, to Nov., 1875, and one offered by E. R. Hoar, of Mass., for the appointment of two additional Commissioners.

An amendment, offered by Speer, of Pa., was also adopted after a long struggle, transferring to the Commisoners all the evidence now on file with the Quartermaster General and Commissary General.

Beck offered the following resolu-

tion, which was adopted: WHEREAS, the First National Bank of the city of Washington recently became insolvent and is now in the hands of a receiver, in conseuence, as is alleged, of lending to or placing in the control of a single firm the whole of its capital stock as well as a large part of the money of its depositors which is in palpable violation of the National Banking

Act: and WHEREAS, the circumstances attending the failure of said bank and the character of the management, under which so gress a violation of law could have taken place, demand an investigation to the end that rem-

edies may be applied, to guard against like frauds in the future; therefore, Resolved, That the Committee on Banking and Currency be instructed to examine into the condition of said bank at the time of its failure and into its prior transactions and general management, with power to send for persons and papers.
